**Buffalo - Rochester - Syracuse - Albany**

**Measurement and Control Solutions | Sales - Repair - Calibration**

**GAS DETECTION**

**Draeger** - Patented electrochemical, catalytic, and infrared sensor technology. Lowest cost of ownership - 2-3 times the lifespan of all other brands of sensors, least amount of drift, lowest detection limits, low calibration requirements, lower cross-interference. Predictive diagnostics for pre-sensor failure notification.

**Thermal Gas Systems** - Refrigerant leak detection. High-sensitivity Photoacoustic IR technology; reliable, economical CMOS monitoring technology. Systems ship fully configured and tested.

**H2SCAN** - Patented semiconductor sensor technology for the superior analysis of hydrogen in process and safety applications.

**GAS ANALYSIS**

**Ametek Dycor** - Quadrupole Process Mass Spectrometers. Fast, multi-gas analysis. Plug-and-play, field replaceable components for low maintenance costs.

**Ametek Trace Analytical** - Process gas chromatographs for the continuous analysis of trace impurities of H2, CO, CO2, and hydrocarbons in gases and liquids.

**Ametek Western Research** - Industrial UV-VIS photometric analyzers for chemical composition analyses of inert, reactive, and toxic gases or liquids.

**Baseline Mocon** - PID, FID, and TDC based gas chromatography. PPB to 100% range for single or multiple components.

**Advanced Instruments Inc.** - Patented, long-life electrochemical oxygen sensors, PPB to % ranges.

**Gasmet** - Fourier Transform Infrared (FTIR) analyzers. 25 to 50 gases at a time, ppb level detection, no cross-interference. Industrial process analyzers - portable, process and CEMS versions.

**COMBUSTION AND EMISSIONS**

**Ametek Western Research** - Industrial UV-VIS photometric analyzers for chemical composition analysis of inert, reactive, and toxic gases or liquids.

**Ametek Thermox** - Analyzers for oxygen, combustibles, and methane in combustion flue gases.

**ECOM** - Combustion & emissions analyzers, powerful sampling systems, long life sensors, efficient moisture management, powerful analysis software with easy reporting.

**LIQUID ANALYSIS**

**M4 Knick** - Liquid analytical sensors - dissolved O2, ph/orp, conductivity. Cable to sensor connection is a hermetically sealed, isolated, inductive connection. Submergible, hot swappable.

**Ametek Western Research** - Industrial UV-VIS photometric analyzers for chemical composition analysis of inert, reactive, and toxic gases or liquids.

**INTRINSIC SAFETY AND EXPLOSION PROTECTION**

**Pepperl+Fuchs** - Intrinsically safe and explosion proof signal conditioners. Barriers and Isolators. Purge Pressurization Systems.

**E2S** -High performance audible and visual signals for commercial, industrial, marine, onshore and offshore hazardous locations.

**PRESSURE, TEMPERATURE, LEVEL, FLOW, HUMIDITY**

**Kahn Instruments** - Precision hygrometers for moisture measurement. Measure in gases from vacuum to 6000 PSIG.

**Tek-Trol** - Pressure, Temperature, Level, Flow: Transmitters, Electromagnetic, Coriolis and Vortex, Flowmeters, Ultrasonic, Guided Wave and Radar Level Transmitters.

**Kurz Instruments** - Insertion, In-Line, Multipoint & Portable Flow Meters. Monitoring and measuring of industrial gas flows.

**Bronkhorst** - Low flow and pressure thermal mass flowmeters and controllers; Coriolis flowmeters and controllers for air, gas, liquids and dosing systems.

**Lumasense** - Infrared temperature solutions covering a wide range of temperature, materials and environments. High accuracy and precision point sensing infrared temperature transmitters.

**Marsh Bellofram** - Mechanical Pressure Gauges, Current to Pneumatic Converters, Electronic Timers, Counters, Relays, and Displays. Thermometers and Thermocouples.

**Pulsar Process Measurement** - Level and Flow Measurement. Ultrasonic measurement and DATEM digital echo processing "Digital Adaptive Tracking of echo Movement".

**Turbines** - Liquid & gas turbine meters, in-line from 3/8" through 10.0". Custom configurations, high-pressure up to 15,000 PSIG.

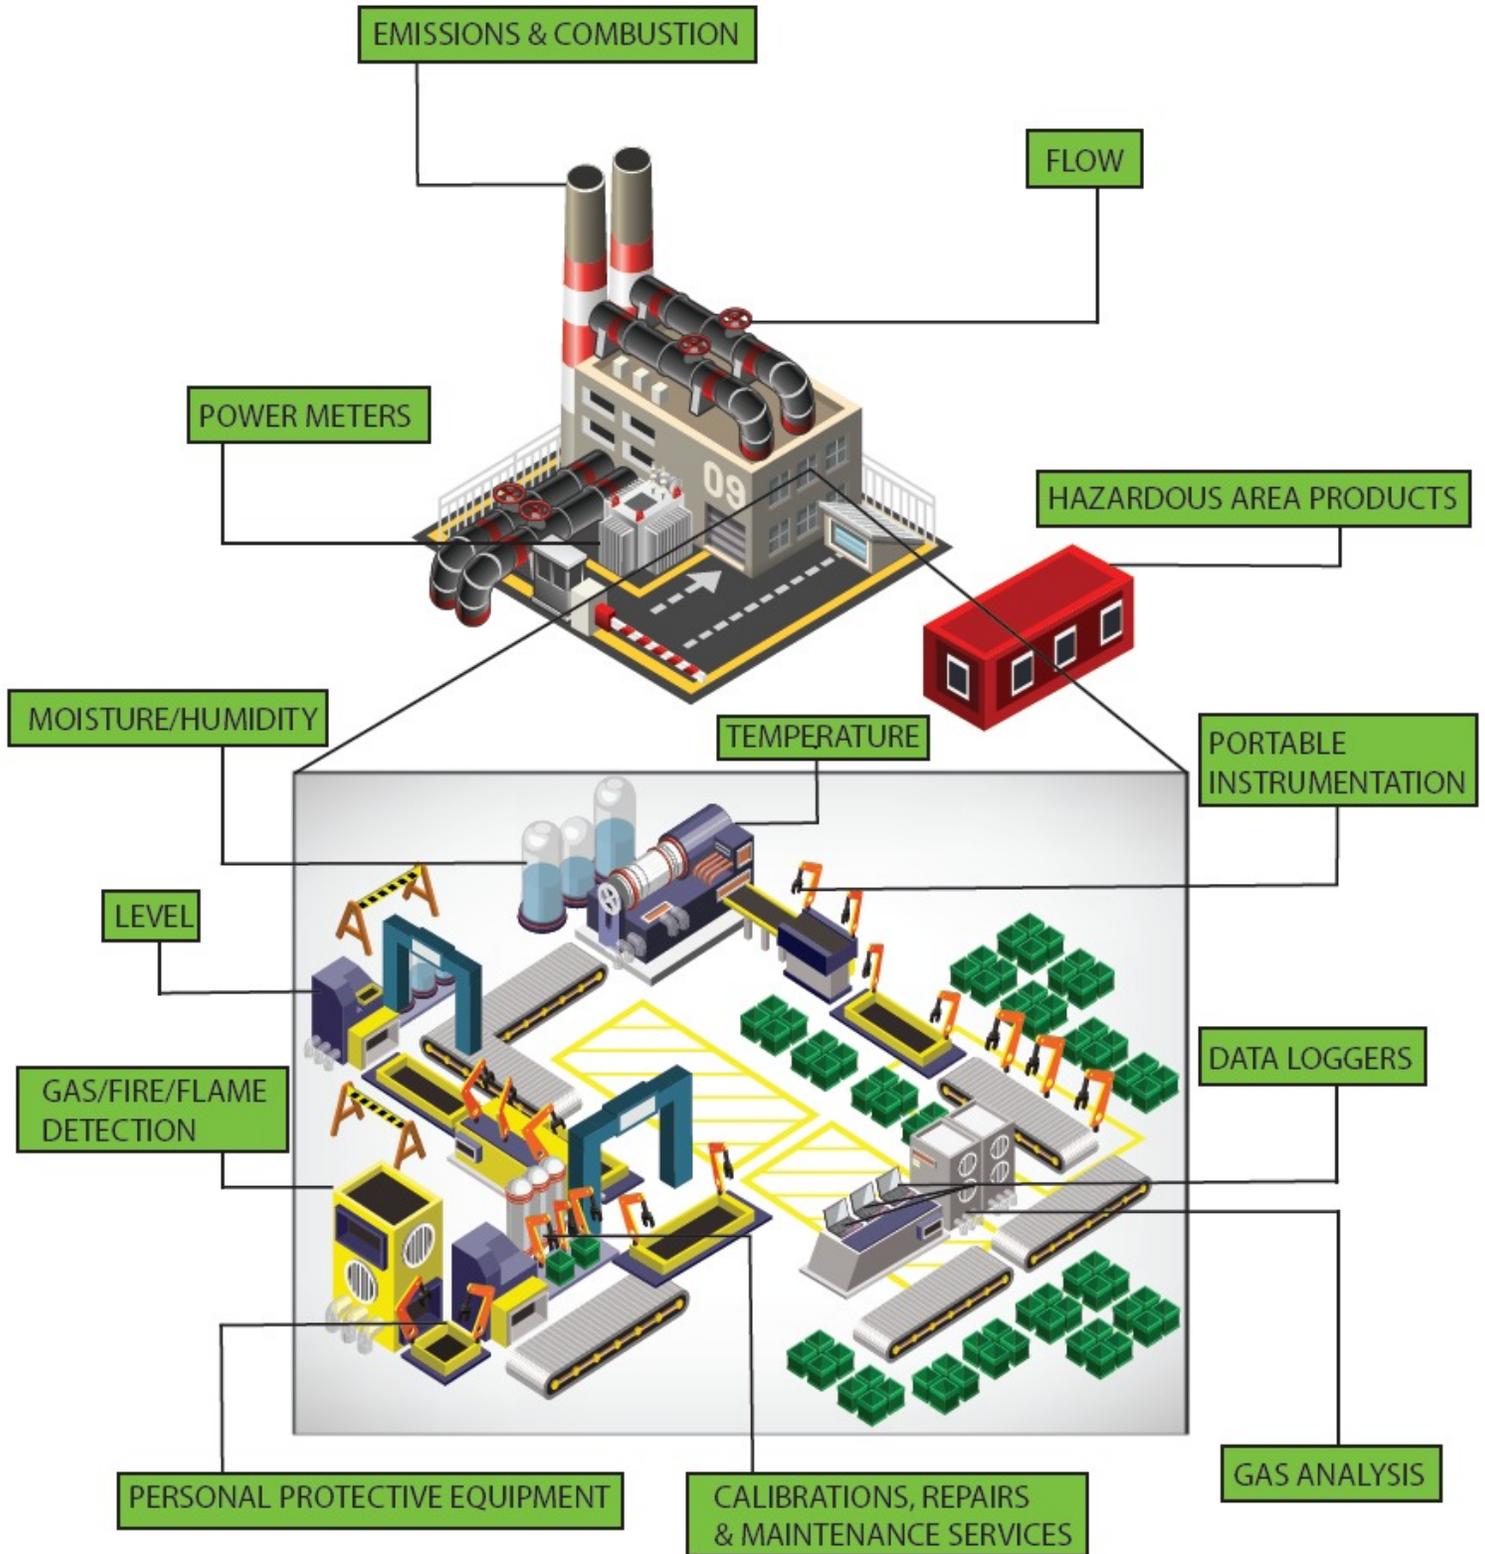

**Thermon/CCI Thermal Technologies** - Engineered Electric Heat, Flange, Screw, Immersion, Tube and calibration Heaters, General purpose and Explosion Proof Air and Space Heaters and Control Systems.

**DATA ACQUISITION, CONTROLLERS, SIGNAL CONDITIONING**

**Eurotherm by Schneider Electric** - Process controls, data acquisition, hybrid control and recorders, power controls, complete measurement and control system and related equipment.

**Action Instruments** - Innovative solutions to remote signal conditioning and isolation applications.
