FEATURED PRODUCTS AND MANUFACTURERS

Introducing Ametek Land

Leading manufacturer of cutting-edge instrumentation and analyzers designed for non-contact industrial infrared temperature measurements, combustion efficiency assessment, and environmental pollutant emissions monitoring

Fixed Spot Non-Contract Thermometers / Pyrometers

Fixed Thermal Imagers and Line Scanners

Thermal Imaging Borescopes

Portable Non-Contract Thermometers

Opacity and Dust Monitors

Combustion Efficiency Monitors

Ametek Western Research

Chemical Composition Analyzers

Chlorine Dioxide Analyzer

Color Monitors

Hydrocarbon Due Point of Natural Gas

Hydrogen Sulfide Analyzers

Sulfur Recovery Unit Analyzers

- On-line process analyzers for the compositional analysis of gas and liquid sample streams

Draeger Flame Detection

UV-IR Flame Detection

Visual Flame Detection

- UV/IR flame detection can detect hydrocarbon-based fuel and gas fires, invisible flames, and fires from hydrides, ammonia, silane and other organics
- Patented visual flame detection
- No false alarms from reflected heat/energy, humidity, rain, or snow
- Video show and document alarm events
- Works seamlessly with industry-standard fire alarm panels and other safety systems/PLCs
- Class 1, Div 1, FM certified for silane

Clayborn Lab

An industry leader in adhesive heat technology, Clayborn Lab started developing technology for the US Space Program and now offer Heat Tape and Heated Sample Lines (heated tubing), for uses in multiple industries. The appropriate heat tape options can be engineered for your exact requirements.

Heat Tape

Heated Sample Lines

- Thermally conductive adhesive is the secret to Clayborn's extraordinary heat transfer
- Clayborn manufactures a thin, flexible, specific watt density heat tape in 1/2", 1/4" and 1/6" widths that can achieve temperatures up to 500°F
- At the heart of this innovative product, is Clayborn Heat Tape, spirally wrapped onto your choice of tubing (Teflon, aluminum, stainless steel, etc.) with your choice of sizing (1/16" O.D. to 4" O.D.) and accessories
- Custom engineered for individual use, Heated Sample Lines give you the flexibility to heat most anything using voltages from 12VDC to 277VAC
